

Open Text Everywhere

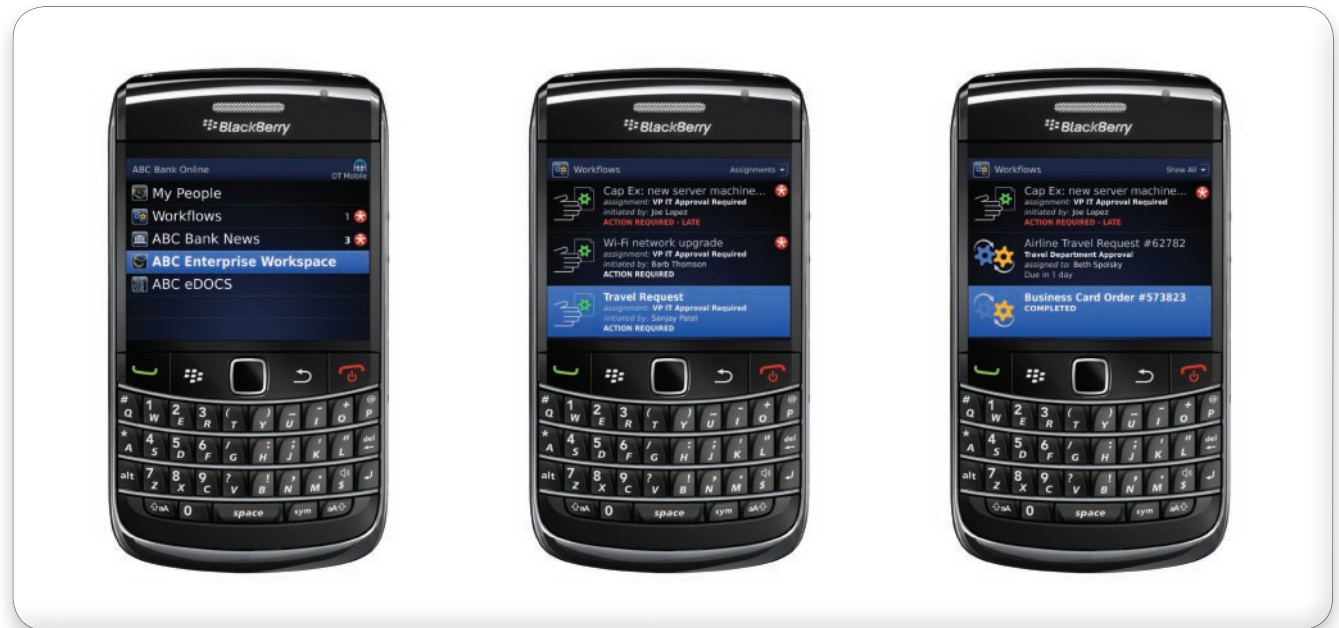

Enterprise Content Management in the palm of your hand

Business doesn't stop when you step away from your desk

Open Text solves the number one need of knowledge workers—being productive when they are away from their office. Open Text Everywhere enables government workers, financial and insurance firms, and successful businesses around the globe to extend the capacity of their enterprise applications to their mobile communities by providing accessibility to mission critical information and business processes for mobile workers so they can stay connected—regardless of where they are.

Foster user engagement—everywhere

Open Text Everywhere provides flexibility for today's knowledge workers who require constant up-to-date information from their enterprise, regardless of the when and where. Easy access to collaborative communities via mobile devices opens the door to content sharing, information exchange, and mentorship with a broader range of people, including field employees or remote locations, trusted advisors, customers, and partners.

Mobile Home adapts dynamically to reflect specific customer environments.

View workflow assignments and critical processes updated in real time, everywhere!

Assignment overviews allow users to view and identify critical and new processes at the touch of a button.

We can do more than just email

Open Text Everywhere will provide a comprehensive view of people, process, and content delivered via a native application unique to each mobility platform. Suddenly vital business applications, like those listed below, are mobilized to keep your business moving forward:

- **Website content management everywhere**—Respond to real time events, news/announcements/emergencies/outages
- **Transactional content management and ERP**—Approvals after hours, immediate, trackable, process-driven decisions in accordance with corporate standards
- **Email management**—Deliver accountability and corporate governance to mobile email content
- **Collaboration**—Extended your knowledge worker ecosystem through mobility
- **Document management**—Create, consume, and control documents securely on your mobile device
- **Media management**—Import mashed up content images, video, and text straight from your phone into secure, searchable repositories, online partner/corporate social networks

This type of mobility allows the end user to initiate, edit, and complete tasks, and communicate and collaborate with team members more easily—from anywhere, increasing accessibility and productivity and helping workers avoid missed revenue opportunities, improve customer services, and improve work/life balance among employees.

- Open Text Everywhere gives an end user comprehensive access to their enterprise systems, including initiate and edit a workflow
- Attach content to or action a workflow
- Communicate, collaborate, search, view, and download content stored in the enterprise library
- View “My People” to connect with users and get important info from member profiles
- See community content
- Participate in discussions
- View and add to wikis and blogs

Open Text Everywhere removes the constraints of enterprise boundaries, thus enabling businesses to enhance productivity, increase revenues, and maximize competitive advantage.

Feature Benefits

- **Engagement Everywhere**—Content comes with you so mobile workers stay involved with your customers, your business, and your internal teams—whenever and wherever you are!
- **Lifecycle Everywhere**—Continue to create, manage, find, publish, and govern content in a compliant fashion.
- **Transactions Everywhere**—Continue to offer mobile workers the processes and applications they depend on to stay productive, collaborate with team members, and keep your business flowing smoothly with little delay or interruption
